# Integrated Defense Acquisition, Technology, and Logistics Life Cycle Management System

Following the Materiel Development Decision, the Milestone Decision Authority may authorize entry into the acquisition process at any point, consistent with phase-specific entrance criteria and statutory requirements

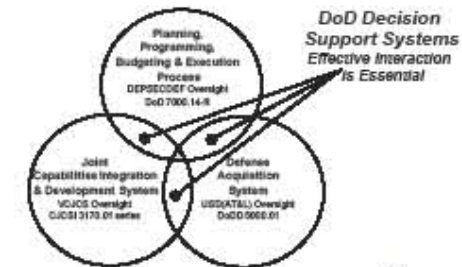

# Huge Life Cycle

- Decades and Decades
- Increments and Modernizations
- System Life Extensions and Resets
- Budgets Go Up and Budgets Go Down
- Emphasis on Corrosion Goes Up and Down
- And Corrosion of Materiel / Facilities Goes On
  - Cannot Truly “Prevent” Corrosion – Can Only Manage It

# Integrated Defense Acquisition, Te

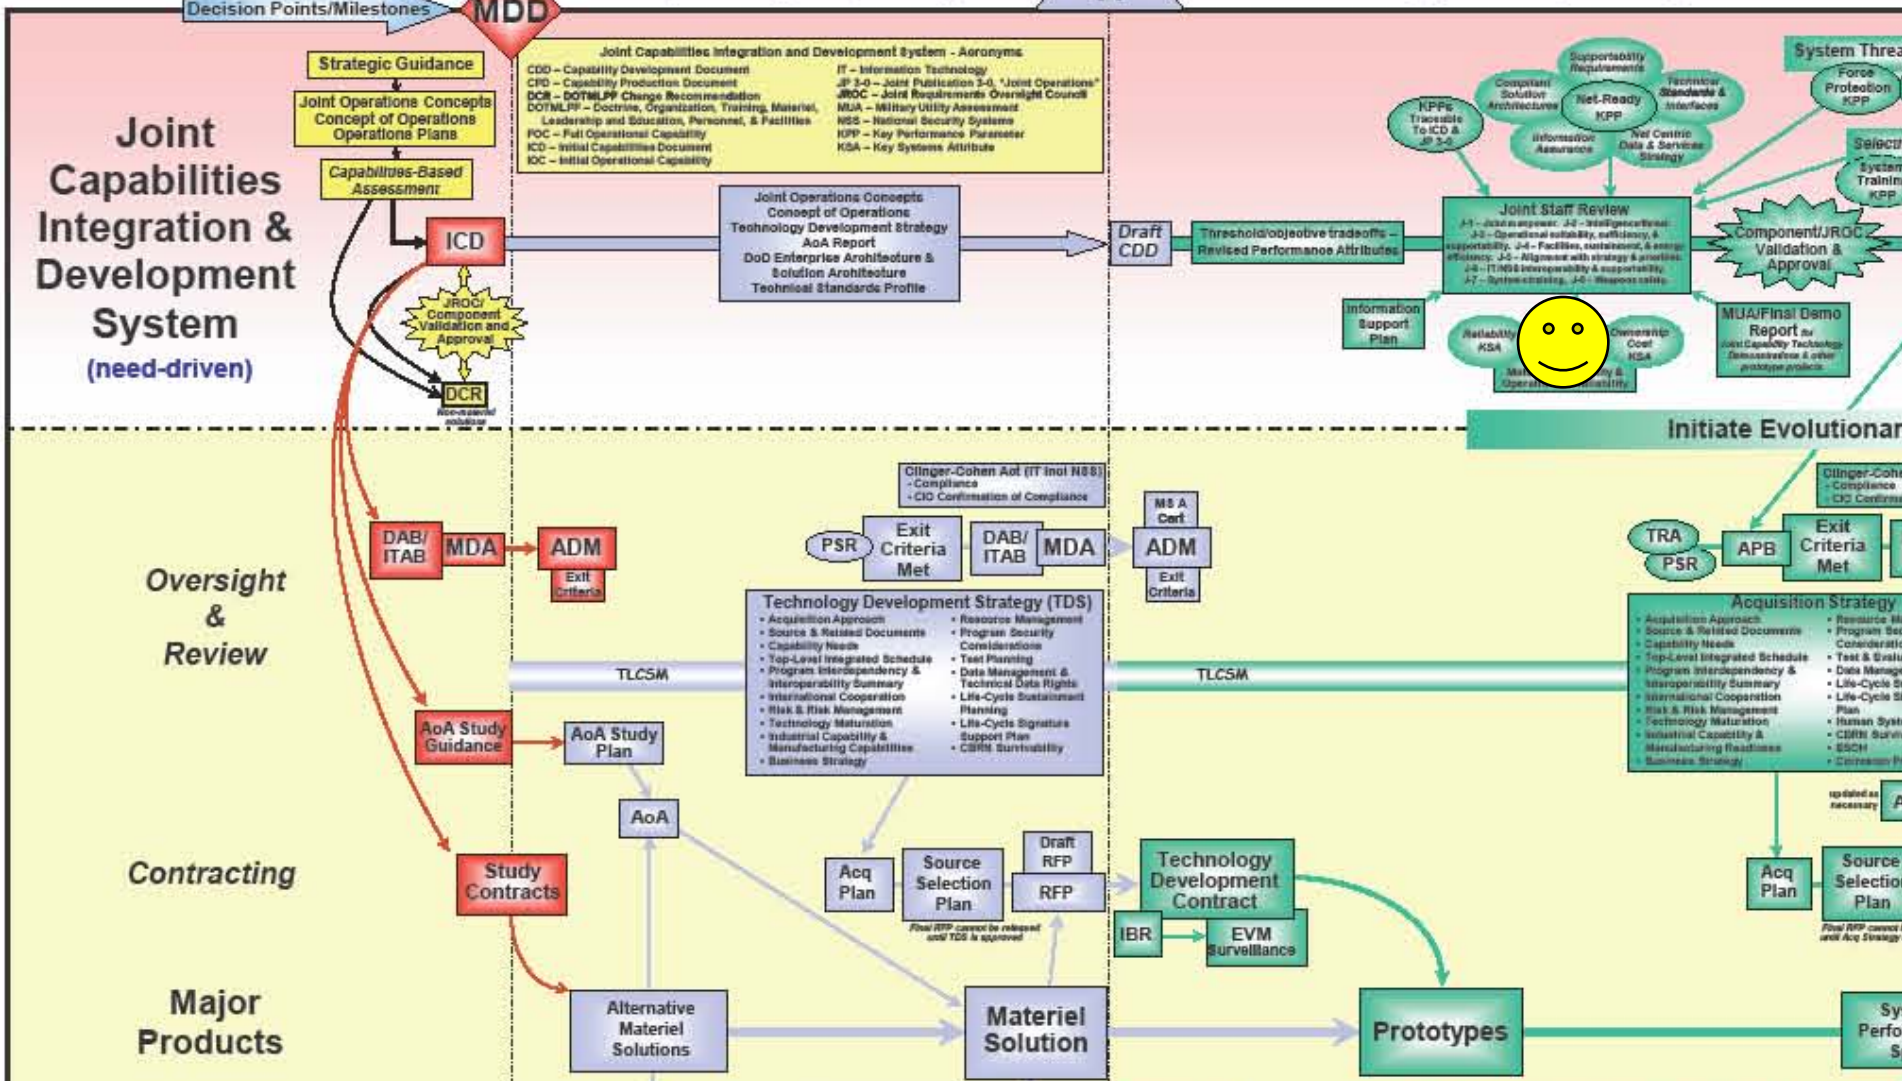

Following the Materiel Development Decision, the Milestone Decision Authority may authorize entry

## Material Solution Analysis Phase

Complete Analysis of Alternatives to assess potential materiel solutions to capability need, identify key technologies and estimate life cycle costs. Consider commercial-off-the-shelf and solutions from both large and small business. Identify materiel solution to capability need. Complete Technology Development Strategy.

## Technology Development Phase

Reduce technology risk, determine and mature appropriate set of technologies to integrate into full system, critical technology elements on prototypes, and complete preliminary design. Identify an affordable and increment of militarily useful capability, demonstrate technology in relevant environment, and assess manufacturing risks. Provide for two or more competing teams producing prototypes of system and/or key system elements prior to or through Milestone B.

# DOD Weapon System Acquisition Reform

## Product Support Assessment

### November 2009

---

“Product support [system sustainment], vital to both acquisition and logistics, has been treated as the stepchild of both functions. The acquisition community has neglected it, and the logistics community seems mismatched to effectively perform its demanding scope.”

# DOD Weapon System Acquisition Reform

## Product Support Assessment

November 2009

---

Governance - Recommendation: Improve weapon system governance so sustainment factors [think corrosion] are better considered early and consistently across a weapon system life cycle

# DOD Weapon System Acquisition Reform

## Product Support Assessment

November 2009

---

### Human Capital:

- DoD must set clear objectives to integrate product support competencies across the acquisition and logistics workforce domains to institutionalize the successful traits of an outcome-based culture.
- Further, industry product support personnel, along with their government colleagues, must be more seamlessly equipped to acquire requisite product support competencies and proficiencies.

**Circa 1990**

## **CORROSION PROGRAM ACCREDITATION PROGRAM, BACKGROUND**

- ACCREDITATION PROGRAM INITIATED SEPTEMBER, 1988
- PROGRAM WOULD FOLLOW THE NATIONAL ASSOCIATION OF CORROSION ENGINEERS (NACE) ACCREDITATION GUIDELINES
- PROGRAM TRAINING SIMILAR TO NDT TRAINING AR 702-22
- PROBLEMS:
  - NACE ESTABLISHED TO ASSIST THE PETRO-CHEMICAL INDUSTRY, NOT THE ARMY
  - TRAINING TOO TECHNICAL
  - EXAMPLES NOT RELEVANT TO ARMY COMMUNITY
  - PROGRAM DIFFICULT TO DUPLICATE IN ARMY SYSTEM

**It's déjà vu all over again**

# Everything Has to Go Exactly Right

- If You Start With a Corrosion Resistant Design...
  - No Skip Welds
  - Abundant Drain Holes
  - Sound Material Selection
  - State of the Art / Marketplace Coatings and Treatments
- But Any of the Other “ilities” Are Not Done Right...
  - Insufficient Packaging
  - Outdoor Storage
  - Inconsistent Supply Logistics
  - Irregular Maintenance
  - Uncontrolled Climate Facilities

...You **Still** End Up with Corrosion

# Everything Has to Go Exactly Right

- If You Start Without a Corrosion Resistant Design...
  - Skip Welds
  - Water Collection Areas
  - Galvanic Couples

# Integrated Defense Acquisition, Technology, and Logistics Life Cycle Management System

Following the Materiel Development Decision, the Milestone Decision Authority may authorize entry into the acquisition process at any point, consistent with phase-specific entrance criteria and statutory requirements

This chart is a classroom and for Defense Acquisition University students. It provides a national illustration of references among three major decision support systems used to develop, produce and field a weapon system for national defense. Defense Acquisition is a resource process with many more activities than shown here. Many more resources are available that cannot be displayed in a two-dimensional chart. Supporting information is on hand at this chart. For more information, see the Acquisition, Technology, and Logistics Knowledge Training System (ATLKS) chart.

# Who Has to Get It Right?

You Do!

# If Not...

Corrosion: It's Your Fault

(Or at least that's my opinion anyway.)
